

General description

Plazomicin is a next-generation aminoglycoside ("neoglycoside") used in the treatment of multi-drug resistant infections caused by carbapenem resistant Enterobacteriaceae, carbapenem-resistant *Pseudomonas aeruginosa* and carbapenem-resistant *Acinetobacter baumannii*.

INN	Plazomicin
ATC codes	J01GB14
Medicine type	Chemical agent
Antibiotic groups	R RESERVE
EML status history	First added in 2019 (TRS 1021) for Carbapenem resistant Enterobacteriales Added in 2019 (TRS 1021) for Carbapenem-resistant <i>Pseudomonas aeruginosa</i> Added in 2019 (TRS 1021) for Carbapenem resistant <i>Acinetobacter baumannii</i>
