

General description

Factor IX complex also known as prothrombin complex concentrate is a medication made up of blood clotting factors II, VII IX, and X. It is used to treat and prevent bleeding in hemophilia B. It may also be used in those with not enough of these factors due to other reasons such as warfarin therapy.

ATC codes	B02BD01
Medicine type	Biological agent
EML status history	First added in 1979 (TRS 641) for Haemophilia B Added in 1979 (TRS 641) for Coagulation defects, purpura or other haemorrhagic or related conditions
Wikipedia	Coagulation factor ix complex
DrugBank	Coagulation factor ix, ii, vii, x (Factor IX Complex (Human))

Recommendations

Section **Blood coagulation factors**

Parenteral > General injections > IV: 500 IU in vial powder for injection; 1000 IU in vial powder for injection

Indications

Haemophilia B

Coagulation defects, purpura or other haemorrhagic or related conditions
