

## Entecavir

| Section                                                                                                                                           | Indications         |
|---------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Medicines for hepatitis B > Nucleoside/Nucleotide reverse transcriptase inhibitors<br>Oral > Liquid: 0.05 mg per mL<br>Oral > Solid: 0.5 mg; 1 mg | Chronic hepatitis B |

## Tenofovir alafenamide

| Section                                                                                                   | Indications         |
|-----------------------------------------------------------------------------------------------------------|---------------------|
| Medicines for hepatitis B > Nucleoside/Nucleotide reverse transcriptase inhibitors<br>Oral > Solid: 25 mg | Chronic hepatitis B |

## Tenofovir disoproxil fumarate

| Section                                                                                                                                                       | Indications         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Medicines for hepatitis B > Nucleoside/Nucleotide reverse transcriptase inhibitors<br>Oral > Solid: 300 mg tablet (equivalent to 245 mg tenofovir disoproxil) | Chronic hepatitis B |
