

# Model List of Essential Medicines

## Compound sodium lactate solution

Section	Indications
Solutions correcting water, electrolyte and acid-base disturbances > Parenteral	Other specified disorders of fluid, electrolyte or acid-base balance
Parenteral > General injections > IV: injectable solution	Hypovolaemic shock

## Glucose

Section	Indications
Solutions correcting water, electrolyte and acid-base disturbances > Parenteral	Other specified disorders of fluid, electrolyte or acid-base balance
Parenteral > General injections > IV: 5% isotonic; 10% hypertonic	Hypoglycaemia without associated diabetes
Parenteral > General injections > IV: 50% hypertonic	

## Glucose + sodium chloride

Section	Indications
Solutions correcting water, electrolyte and acid-base disturbances > Parenteral	Other specified disorders of fluid, electrolyte or acid-base balance

## Potassium chloride

Section	Indications
Solutions correcting water, electrolyte and acid-base disturbances > Parenteral	Hypokalaemia
Parenteral > General injections > IV: 11.2% in 20 mL ampoule (equivalent to K+ 1.5 mmol/mL and Cl- 1.5 mmol/mL); 7.5% solution for dilution (equivalent to K+ 1 mmol/mL and Cl- 2 mmol/mL); 15% solution for dilution (equivalent to K+ 2 mmol/mL and Cl- 2 mmol/mL)	

## Sodium chloride

Section	Indications
Solutions correcting water, electrolyte and acid-base disturbances > Parenteral	Other specified disorders of fluid, electrolyte or acid-base balance
Parenteral > General injections > IV: 0.9% isotonic (equivalent to Na+ 154 mmol/L and Cl- 154 mmol/L)	

## Sodium hydrogen carbonate

Section	Indications
<p>Solutions correcting water, electrolyte and acid-base disturbances &gt; Parenteral Parenteral &gt; General injections &gt; IV: 1.4% isotonic (equivalent to Na+ 167 mmol/L and HCO3- 167 mmol/L); 8.4% in 10 mL ampoule (equivalent to Na+ 1000 mmol/L and HCO3- 1000 mmol/L)</p>	Acidosis
