Résumé des preuves et recommandation du comité d'experts

Didanosine was recommended for deletion from the EML and EMLc as it was not longer aligned with dosing guidelines in the 2013 WHO Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection (1). References: Consolidated guidelines on the use of antiretroviral drugs for treating and preventing HIV infection: recommendations for a public health approach. Geneva: World Health Organization; 2013. Available from: http://apps.who.int/iris/bitstream/10665/85321/1/9789241505727_eng.pdf.
