Summary of evidence and Expert Committee recommendations

Following the review of square box listings on the EML and EMLc, the Expert Committee recommended that fixed-dose combinations of medicines in 4th level ATC chemical subgroup, C09AA ACE inhibitors, plain (for lisinopril) and chlorothiazide, chlortalidone and indapamide (for hydrochlorothiazide), be specified as therapeutic alternatives under the square box listing for lisinopril + hydrochlorothiazide on the EML.
