Résumé des preuves et recommandation du comité d'experts

Following the review of the age-appropriateness of formulations of essential medicines for children, the Expert Committee recommended the following changes to the listing of salbutamol on the EML and EMLc: - update the listing description of inhalation delivery systems for consistency across the Model Lists and to better reflect product characteristics. - amend the listed strength of salbutamol injection from 50 micrograms/mL in 5 mL ampoule to 500 micrograms/mL in 1 mL and 5 mL ampoules.
