

Section: 26. Solutions correcting water, electrolyte and acid–base disturbances > 26.2. Solutions correcting water, electrolyte and acid-base disturbances > Parenteral

		EMLc	ATC codes: <b>B05CX01</b>
Indication	Other specified disorders of fluid, electrolyte or acid-base balance	ICD11 code: <b>5C5Y</b>	
Medicine type	Chemical agent		
List type	Core (EML) (EMLc)		
Formulations	Parenteral > General injections > IV: 5% isotonic ; 10% hypertonic		
EML status history	First added in 1977 ( <a href="#">TRS 615</a> ) Changed in 1979 ( <a href="#">TRS 641</a> ) Changed in 1999 ( <a href="#">TRS 895</a> ) Changed in 2007 ( <a href="#">TRS 950</a> ) Changed in 2009 ( <a href="#">TRS 958</a> )		
Sex	All		
Age	Also recommended for children		
Therapeutic alternatives	The recommendation is for this specific medicine		
Patent information	Patents have expired in most jurisdictions Read more <a href="#">about patents</a> .
