

## [Trastuzumab](#)

Statut de médicament essentiel

Section:

[8. Immunomodulators and antineoplastics](#) [8.2. Antineoplastics and supportive medicines](#) [8.2.2. Targeted therapies](#)

Codes ATC: [L01FD01](#)

Indication

Carcinoma of breast, specialised type Code ICD11: [2C60](#)

INN

Trastuzumab

Type de médicament

Biological agent

Type de liste

Liste complémentaire

Additional notes

Including quality-assured biosimilars

Formulations

**Parenteral > General injections > IV:** 60 mg in vial powder for injection ; 150 mg in vial powder for injection ; 440 mg in vial powder for injection

Historique des statuts LME

Ajouté pour la première fois en 2015 ([TRS 994](#))

Résumé des preuves et recommandation du comité d'experts

The Committee noted the correspondence from the European Society for Medical Oncology (ESMO) requesting recognition of biosimilars of rituximab and trastuzumab on the EML. The Committee agreed that quality-assured biosimilars of these monoclonal antibodies represent an opportunity for expanding affordable access to cancer medicines for health systems. To help improve access, the Committee recommended the current listing for intravenous rituximab on the EML should indicate that quality-assured biosimilars of rituximab should also be considered as essential medicines. In addition, the Expert Committee recommended that WHO continue to facilitate access to biosimilars through the Prequalification programme and WHO Collaborative Registration Procedure.
