Summary of evidence and Expert Committee recommendations

Following the review of the age-appropriateness of formulations on the EMLc, the Expert Committee recommended the listings for albendazole 400 mg chewable tablets on the EML and EMLc be amended to specify that they be scored.

Following the review of the age-appropriateness of formulations on the EMLc, the Expert Committee recommended the addition of a new strength formulation (200 mg chewable tablets) to the EMLc for treatment of diseases caused by taeniid cestode cysts.
