
### Indication
Fungal infection of the skin

**ICD11 code:** EA60.Z

**ATC codes:**
- D01AE15
- EMLc

### INN
Terbinafine

### Medicine type
Chemical agent

### List type
Core (EML) (EMLc)

### Formulations
- Local > Topical > Cream: 1% terbinafine hydrochloride
- Local > Topical > Ointment: 1% terbinafine hydrochloride

### EML status history
First added in 2011 (TRS 965)

### Sex
All

### Age
Also recommended for children

### Therapeutic alternatives
The recommendation is for this specific medicine

### Patent information
Patents have expired in most jurisdictions

### Wikipedia
Terbinafine

### DrugBank
Terbinafine

**Summary of evidence and Expert Committee recommendations**

Following a review of dermatological medicines on the Model Lists prepared by the International League of Dermatological Societies, the Expert Committee recommended the addition of terbinafine cream and ointment to the core list of the EML and EMLc. The Committee noted that although terbinafine ointment is reported to be more effective than 1% azoles for the treatment of tinea pedis, the evidence provided in the review was not sufficient to support this claim. It is relatively expensive, but is increasingly available from generic sources.
