Terbinafine

Section: 13. Dermatological medicines > 13.1. Dermatological medicines > Antifungal medicines

EMLc | Codes ATC: D01AE15

Indication	Fungal infection of the skin Code ICD11: EA60.Z
INN	Terbinafine
Type de médicament	Chemical agent
Type de liste	Liste de base
Formulations	**Local > Topical > Cream:** 1% terbinafine hydrochloride **Local > Topical > Ointment:** 1% terbinafine hydrochloride
Historique des statuts LME	Ajouté pour la première fois en 2011 (TRS 965)
Sexe	Tous
Âge	Aussi recommandé pour les enfants
Équivalence thérapeutique	La recommandation concerne ce médicament spécifique
Renseignements sur le brevet	Patents have expired in most jurisdictions Lire la suite sur les brevets.
Wikipédia	Terbinafine
DrugBank	Terbinafine

Résumé des preuves et recommandation du comité d'experts

Following a review of dermatological medicines on the Model Lists prepared by the International League of Dermatological Societies, the Expert Committee recommended the addition of terbinafine cream and ointment to the core list of the EML and EMLc. The Committee noted that although terbinafine ointment is reported to be more effective than 1% azoles for the treatment of tinea pedis, the evidence provided in the review was not sufficient to support this claim. It is relatively expensive, but is increasingly available from generic sources.
