Résumé des preuves et recommandation du comité d'experts

Following the review of the age-appropriateness of formulations on the EMLc, the Expert Committee recommended: - the addition of midazolam solution for oral administration 5 mg/mL and 10 mg/mL to the EML and EMLc; - the deletion of midazolam solid oral dosage forms from the EMLc; - to modify the formulations descriptions of midazolam injection to better describe the available dosage forms.
