Résumé des preuves et recommandation du comité d'experts

Carboplatin was originally added to the complementary list of the EML in 2009 as a treatment of advanced ovarian cancer. In 2015, as part of the comprehensive review of cancer medicines undertaken by the Expert Committee, listing for carboplatin on the complementary list of the EML and EMLc for use in treatment protocols for osteosarcoma was specifically endorsed. The relevant extract from TRS994 regarding the Expert Committee's consideration of treatment protocols for osteosarcoma is attached.
