## Summary of evidence and Expert Committee recommendations

The Committee recommended deletion from the EML and/or EMLc of various formulations and strengths of amikacin (injection: 100 mg/2 mL (as sulfate) in 2 mL vial), ethambutol (Oral liquid: 25 mg/mL), ethionamide (tablet: 125 mg), isoniazid (oral liquid: 50 mg/5 mL), linezolid (powder for oral liquid: 100 mg/5 mL), p-aminosalicylic acid (granules: 4 g in sachet) and pyrazinamide (oral liquid: 30 mg/mL), noting that they are not optimal formulations and strengths for tuberculosis treatment.
