

# Fosfomycin (injection)

NOT RECOMMENDED AS AN  
ESSENTIAL MEDICINE

Section: 6. Anti-infective medicines > 6.2. Antibacterials > 6.2.3. Reserve group antibiotics

		EMLc	Codes ATC: J01XX01
Indication	Other specified bacterial diseases	Code ICD11: 1C4Y	
INN	Fosfomycin		
Type de médicament	Chemical agent		
Groupes d'antibiotiques	<b>R</b> RESERVE		
Type de liste	Liste complémentaire (EML) (EMLc)		
Formulations	Parenteral > General injections > IV: 2 g in vial (as sodium) powder for injection ; 4 g in vial (as sodium) powder for injection		
Historique des statuts LME	Ajouté pour la première fois en 2017 (TRS 1006) Retiré en 2019 (TRS 1021)		
Sexe	Tous		
Âge	Aussi recommandé pour les enfants		
Équivalence thérapeutique	La recommandation concerne ce médicament spécifique

## Résumé des preuves et recommandation du comité d'experts

As part of the review of the AWaRe classification and EML listing of antibiotics, the Expert Committee recommended selected Reserve group antibiotics be listed as individual medicines on the WHO Model Lists when they have a favourable benefit-risk profile and proven activity against "Critical Priority" or "High Priority" pathogens as identified by the WHO Priority pathogens list. Refer to the 2019 recommendations for new indications for intravenous fosfomycin on the EML and EMLc.
