

Section: [11. Blood products of human origin and plasma substitutes](#) > [11.2. Plasma-derived medicines](#) > [11.2.1. Human immunoglobulins](#)

ATC codes: [J06BB01](#)

Indication	Maternal care for red cell antibodies	ICD11 code: <a href="#">JA86.0</a>
Medicine type	Biological agent	
List type	Core	
Additional notes	All human plasma-derived medicines should comply with the WHO requirements.	
Formulations	Parenteral > General injections > IV: 250 µg in single-dose vial Parenteral > General injections > IM: 250 µg in single-dose vial	
EML status history	First added in 1977 ( <a href="#">TRS 615</a> ) Changed in 1979 ( <a href="#">TRS 641</a> ) Changed in 1982 ( <a href="#">TRS 685</a> ) Changed in 1989 ( <a href="#">TRS 796</a> ) Changed in 2015 ( <a href="#">TRS 994</a> )	
Sex	Female	
Age	Adolescents and adults	
Therapeutic alternatives	The recommendation is for this specific medicine	
Patent information	Read more <a href="#">about patents</a> .

## Summary of evidence and Expert Committee recommendations

The Expert Committee recommended that immunoglobulins of human origin currently listed in Section 19.2 Sera and immunoglobulins, should be transferred to Section 11.2.1 Human immunoglobulins.
